linkedin.com/in/parthava-borah-98253713a

SKILLS

Languages

JavaScript, TypeScript, Python, C, C++

Frontend

React.js, Redux, HTML, CSS, Bootstrap

Backend

Node.js, Express.js, NestJS, Flask

Databases

MongoDB, PostgreSQL, MySQL

Testing

Manual Testing, Postman, Test Case Design, Jira

Tools

Git, GitHub, Prisma

AI Technologies

LangChain. LangGraph, RAG, MCP

PROFESSIONAL SUMMARY

Software Engineer with experience in full-stack web application development using React.js, Node.js, Express.js, NestJS, and MongoDB/PostgreSQL. Skilled in manual testing, REST API testing using Postman, Jira, and test case design. Passionate about building reliable, scalable, and high-quality software solutions. Seeking opportunities as a Software Engineer or AI Engineer.

WORK EXPERIENCE

Programmer Analyst Trainee

Sept 2021 – Apr 2022

TechVariable

- Developed and maintained full-stack web applications using React.js and NestJS.
- Designed and implemented REST APIs for business applications.
- Performed API testing using Postman.
- Wrote and executed manual test cases.
- Logged, tracked, and verified defects using Jira.
- Collaborated with developers to reproduce, troubleshoot, and resolve software defects before release.

Career Break – Civil Services Examination Preparation

May 2022 – Present

- Prepared full-time for competitive Civil Services examinations, strengthening analytical, research, problem-solving, and time-management skills.
- Now transitioning back to software engineering and quality assurance, with a focus on applying my previous development and testing experience.

EDUCATION

B.Tech (Hons.), Computer Science & Engineering

2015 – 2020

Girijananda Chowdhury Institute Of Management And Technology · CGPA: 6.38/10

Senior Secondary (XII), Science

2015

Biswanath College (Under AHSEC) · 63.60%

Secondary (X)

2013

Little Star School (Under SEBA) · 70.33%

PROJECTS

Agentic AI Exam Prep Assistant

Tech Stack: FastAPI, LangChain, ChromaDB, Next.js

- Developed a full-stack Agentic RAG application that uses LLM-based intent classification to dynamically route queries to specific tools (ChromaDB for PYQ retrieval, Tavily for live news, and LLM for general reasoning).
- Designed a reasoning pipeline for solving specific exam questions by extracting metadata, performing vector lookups, and generating detailed explanations.
- Built a highly responsive Next.js frontend featuring custom MCQ card rendering, dark mode, and seamless API integration.

HR Management System

Tech Stack: React.js, NestJS, MongoDB

- Developed a full-stack HR management application with modules for Employee Records, Leave Management, Attendance, Performance Evaluation, and Event Management.
- Designed and implemented RESTful APIs using NestJS for employee and HR operations.
- Integrated MongoDB for secure storage and retrieval of organizational data.
- Performed API testing using Postman and validated application functionality through manual testing.
- Wrote and executed test cases to verify key business workflows and ensure application quality.

Document Management System

Tech Stack: React.js, NestJS, PostgreSQL, Prisma ORM

- Developed a document management system supporting document upload, version control, and document tracking.
- Built backend APIs using NestJS and managed relational data using PostgreSQL with Prisma ORM.
- Performed REST API testing using Postman to validate CRUD operations and business logic.
- Executed functional and regression testing to verify document lifecycle and version management features.

College Website & Administration Portal

Tech Stack: Flask, MySQL, HTML, CSS, Bootstrap

- Developed backend modules for student admissions and website administration using Flask.
- Designed and integrated MySQL database for managing student and administrative records.
- Tested application functionality, validated form inputs, and verified backend API responses.

Learning Management System (LMS)

Tech Stack: React.js, Redux, Node.js, Express.js, MongoDB

- Developed a full-stack Learning Management System (LMS) for managing online courses, users, and learning resources.
- Built responsive user interfaces using React.js and managed application state efficiently with Redux.
- Developed RESTful APIs using Node.js and Express.js for user authentication, course management, and content delivery.
- Integrated MongoDB for storing user profiles, course details, enrollments, and learning progress.
- Performed API testing using Postman and validated application functionality through manual testing.
- Implemented input validation, authentication, and error handling to improve application reliability and user experience.

Flower Image Classification

Tech Stack: Python, Tkinter

- Developed an image classification application using the Flower17 dataset with data augmentation techniques.
- Built a desktop GUI using Tkinter for image selection and prediction.
- Improved classification performance by applying preprocessing and augmentation methods.
- Evaluated model performance using multiple test images.
